- Revenues in Q4'22 amounted to PLN 233.7m (+158% y/y), in line with our expectations.
- On a standalone basis, the Installations segment (which includes the Belarusian border contract) generated PLN 157m in revenue (vs. PLN 74m in Q3'22). Our forecast assumed PLN 160m revenue from the border contract in Q4'22, but we estimate this must have been a few dozen million less (the company said the contract accounted for 44% of revenues of the parent company in 2022, or ca. PLN 188m, and we estimated Q1-3'22 throughput at ca. PLN 85m).
- Gross margin on sales (17.3%) significantly higher y/y and above our assumptions.
- SG&A costs 65% y/y higher. (including management costs ca. 100% higher y/y, impacted by performance bonuses and management changes).
- Negative impact of the other operating activities in Q4'22 (PLN -5.4m) - mainly due to recognition of anticipated contract losses
- EBITDA in Q3'22 amounted to PLN 26.6m (vs. PLN 4.4m a year ago). A result better than our assumptions (we expected PLN 19.6m).
- Financial activities with a slightly negative impact of PLN -0.7m. Before pre-tax profit, the company also recognized an additional PLN -2.6m loss on loss of control (sale of shares in Procom).
- Q4'22 net profit at PLN 15.6m (effective tax rate at 26%), in line with our forecasts.
- Cash flows from operations activities amounted to PLN +17.6m in Q4'22. Prepayments at PLN 42.8m (up vs Q3'22).
- At the end of the period, the company had PLN 51m in net cash.
- Backlog: PLN 558m (vs. PLN 524m after Q3'22).
- Standalone net profit for 2022 was PLN 23.1m. With a dividend policy of paying out 50-75% of net profit, this translates into a forecast DPS in the range of PLN 1.16-1.73.
- The company is "expecting another very good year" in 2023. Management expects the company and the group to achieve "outperformance in the years prior to 2022". The company is also continuing the process of reviewing strategic options ("Zeus is expected to be the next object of sale").

BDM Comment: The company's Q4'22 results on revenue and net profit were in line with our forecasts. Gross margin was clearly above our expectations, but results at the lower levels were burdened by various events, some of which can be considered one-offs. At the end of the year, the company recorded a very good cash position, with this also due to prepayments. The contract on the barrier on the border with Belarus will still affect results at least until Q2'23, while the company also has a significant portfolio in other areas (we note, among other things, the growth in the rail division). Management is positive about the outlook for 2023. The sale of shares in the subsidiary Zeus is also announced.

The report or any copy of it cannot be disseminated, directly or indirectly, in the United States, Canada, Australia or Japan, or transmitted to citizens or residents of a state where its distribution can be restricted by law, which does not limit the possibility of publishing the report on internet websites of the issuer, BDM or GPW. Persons who disseminate this document should be aware of the necessity to comply with such restrictions.

The fact that a recipient has obtained this report does not mean that he shall be treated as a BDM customer. The compilation cannot be published or copied without a prior written consent of BDM.

Persons who will receive this report and who are not professional customers or qualified investors should consult an independent financial advisor before making any investment decision based on this analysis in order to obtain any necessary and crucial explanations concerning the contents of this analysis.

To prepare this analytical report BDM has not considered individual needs or situations of customers. BDM is not obliged to guarantee that a financial instrument or financial instruments covered by this report are appropriate for a given investor.

Opinions of an analyst and any recommendations included in this report neither constitute an investment, legal, accounting or tax advice or a statement that any investment strategy is adequate or appropriate because of individual circumstances concerning the customer, nor constitute personal recommendation.

The analysis is for information purposes only and does not constitute an advertisement or an offer or an invitation to subscribe or purchase financial instruments.

An investor should be aware that each investment decision in the capital market is subject to numerous risks that finally can result in a financial loss suffered by him. The return rate on individual investments can fluctuate depending on various factors beyond the control of the investor. Therefore, a customer who makes a single investment decision should not only check currency and correctness of individual assumptions made by the analyst in the report but also have an independent assessment and own analysis (also based on scenarios other than the ones presented in the report) taking into consideration the level of acceptable risk. When deciding on activity on the capital market the investor should take into consideration the fact that the investment portfolio structure (diversification of investment through possessing more than one financial instrument) can reduce risk exposure to an individual instrument bringing a negative rate of return in a given period. At the same time, however, it can lead to limitation of a positive rate of return the investor could achieve in the case of a single financial instrument in a given time period. The investor should be aware that the investment portfolio structure and any investment strategy for the stock market do not guarantee the achievement of a positive rate of return and do not protect him against final loss.

For the first time this report has been made available to the public on 04.05.2023 (08:50 CEST). Date of preparing the report is the date of making it accessible. Before the recommendation was made accessible, information included in it had been confidential.

The prices of the financial instruments listed in the document have been taken from the real-time pricing as provided by Bloomberg. Data concerning financial instrument prices used in the report could be loaded to 24 hours before the moment of completing the report.

Detailed list of all analytical reports (recommendations) published by BDM during the last 12 months is included in a cyclical “Monthly Report”.

In the opinion of BDM this report has been prepared observing principles of methodological correctness and objectivity on the basis of sources available to the public which BDM considers reliable. The sources of information used in recommendation are all data related to financial instruments concerned and available to an analyst, including current and periodic reports of the company, current and periodic reports of entities used for comparative valuation, business reports, press releases and other.
