- In Q1'20 the group achieved 207 mln PLN of sales (+12% y/y). Gross profit fell to 10 mln PLN. Enter Air reported -45 mln PLN of EBITDA. Net loss was close to 77 mln PLN. The results were lower y/y because of higher external services (the company reported 70 mln PLN, we estimated 32 mln PLN, previous year = 34 mln PLN) and strong negative net financial expenses (mainly because of negative foreign exchange differences; reported -80 mln PLN vs estimated -47 mln PLN).
- Sales of "Air services" segment was around 200 mln PLN, while "On-board sales" division generated 7 mln PLN of sales.
- In commentary Enter Air pointed out that high growth rate of sales is the result of growing business' scale, also in foreign countries.
- In may'19 the group acquired 49% of swiss company Germania Flug AG. Enter Air decided to change it's name to Chair Airlines and started transformation of business model to B2B. In previous reports, the company pointed out that Enter Air is not interested in other acquisitions and the future growth will be based on current assets.
- Cash flow from operating activities was close to 88 mln PLN (vs 3 mln PLN last year).
- COVID-19:
 - The management board claims that impact of COVID-19 will not be a threat for continuation for running a business;
 - The company took some steps to reduce costs (payrolls) and CAPEX;
 - The company renegotiated terms of lease payments;
 - The banks, which cooperate with Enter Air, had offered additional credit lines (c.a. 250 mln PLN);
 - The group is going to apply for financial help from PFR (max. 400 mln PLN);
 - The management board claimed that tour-operators, which are main clients, have stable financial standings;
 - The company proceeded scenario analysis and each of the cases suggests that company will survive current crisis.

Summary of Q1'20 results:

Enter Air results were below our expectations. Despite the solid growth of sales, the company reported higher than we expected cost and strong negative foreign exchange differences. In coming quarters the most important to company's financial results will be impact of COVID-19 on current business of the company (mainly: demand) and tour-operators, which are clients of the group. The management board informed about a few initiatives, which should support company's liquidity in next months. We point out yesterday's statement of M. Morawiecki, who said, that the government is considering repeated implementation of quarantine for people who are returning from abroad (for example from Spain).

The report or any copy of it cannot be disseminated, directly or indirectly, in the United States, Canada, Australia or Japan, or transmitted to citizens or residents of a state where its distribution can be restricted by law, which does not limit the possibility of publishing the report on internet websites of the Issuer, BDM or GPW. Persons who will receive this report and who are not professional customers or qualified investors should consult an independent financial advisor before making any investment decision based on this analysis in order to obtain any necessary and crucial explanations concerning the contents of this analysis.

To prepare this analytical report BDM has not considered individual needs or situations of customers. BDM is not obliged to guarantee that a financial instrument or financial instruments covered by this report are appropriate for a given investor.

Opinions of an analyst and any recommendations included in this report neither constitute an investment, legal, accounting or tax advice or a statement that any investment strategy is adequate or appropriate because of individual circumstances concerning the customer, nor constitute personal recommendation.

The analysis is for information purposes only and does not constitute an advertisement or an offer or an invitation to subscribe or purchase financial instruments.

An investor should be aware that each investment decision in the capital market is subject to numerous risks that finally can result in a financial loss suffered by him. The return rate on individual investments can fluctuate depending on various factors beyond the control of the investor. Therefore, a customer who makes a single investment decision should not only check currency and correctness of individual assumptions made by the analyst in the report but also have an independent assessment and own analysis (also based on scenarios other than the ones presented in the report) taking into consideration the level of acceptable risk. When deciding on activity on the capital market the investor should take into consideration the fact that the investment portfolio structure (diversification of investment through possessing more than one financial instrument) can reduce risk exposure to an individual instrument bringing a negative rate of return in a given period. At the same time, however, it can lead to limitation of a positive rate of return the investor could achieve in the case of a single financial instrument in a given time period. The investor should be aware that the investment portfolio structure and any investment strategy for the stock market do not guarantee the achievement of a positive rate of return and do not protect him against final loss.

For the first time this report has been made available to the public on 31.07.2020 (11:30 CEST). Date of preparing the report is the date of making it accessible. Before the recommendation was made accessible, information included in it had been confidential.

The prices of the financial instruments listed in the document have been taken from the real-time pricing as provided by Bloomberg. Data concerning financial instrument prices used in the report could be loaded to 24 hours before the moment of completing the report.
